

MINI PAPER HAUNTED HOUSE

ART BY NORA AOYAGI

1. Cut out the house. Cut out marked windows. Crease back on all dotted lines except for the zigzag roof line which will be creased forward. Glue the house together.

2. Cut out the chimney and crease back on all dotted lines. Glue the chimney together using only the vertical tab. Allow to dry before applying glue to the two remaining tabs and attaching the chimney to the roof.

3. Cut out the window ghost and crease forward on the dotted line. Apply glue and place the ghost inside the window on the left side of the house, pressing the glued end against the inside wall of the house. Adjust ghost to extend from the window opening at a right angle to the house.

4. Cut out the grave-stones. Crease back on all dotted lines and glue together. Optional: Add your own custom inscriptions to the back side of your gravestones before gluing together.

5. For extra magic, place your haunted house over a battery-operated tea light.
